EDUCATION

University of Calgary

Bachelor of Science in Computer Science

Calgary, Alberta

June 2026

EXPERIENCE

Aesthetic Creations Dental Studio Ltd

Operations & Data Analyst

Calgary, Alberta

Dec 2023 – Sep 2025

- Wrote SQL queries and analyzed spreadsheet data on case volume, turnaround times, remake rates, material usage, and production bottlenecks to surface operational trends.
- Built dashboards and recurring KPI reports tracking delayed cases, technician workload, clinic order volume, and weekly case completion for management.
- Improved digital case workflows from prescription intake through manufacturing, quality control, delivery, and billing by introducing structured monitoring and reducing manual tracking.
- Analyzed historical production data to identify patterns in remakes, delays, and material consumption, supporting operational planning and management decision-making.

Sweetland Day Spa

Information Technology Support Specialist

Calgary, Alberta

Apr 2020 – Aug 2023

- Resolved hardware, software, and network connectivity issues for staff and management through on-site, phone, and email support.
- Installed, configured, and maintained Windows systems, applications, and peripherals for reliable, secure day-to-day operation.
- Created troubleshooting documentation and guided non-technical users on file management, malware detection, internet safety, and other essential IT tasks.

PROJECTS

[Video Game Sales Data Analysis](#) | *Python, Pandas, Matplotlib, Scikit-learn*

Jun 2026 – Aug 2026

- Cleaned, transformed, and analyzed video game sales data with Python to compare trends across genres, platforms, publishers, regions, and global sales.
- Performed exploratory and statistical analysis and built Pandas/Matplotlib visualizations to answer structured research questions and communicate findings.
- Applied feature standardization, K-means clustering, and correlation analysis to identify sales patterns across regions, publishers, platforms, and genres.
- Built a reproducible end-to-end workflow spanning data profiling, cleaning, exploratory analysis, six research questions, visualization, statistical analysis, clustering, and final reporting in Jupyter.

[Wellness Watch Acne](#) | *Python, React, Flask, TensorFlow, MobileNetV2, JavaScript, Keras, NumPy*

May 2026 – Jun 2026

- Built a full-stack web application that classifies uploaded skin images and provides acne-type predictions, confidence scores, and a local tracker for skincare, diet, sleep, workouts, and progress.
- Developed and trained a custom four-class machine learning model for acne image classification using a manually collected dataset, MobileNetV2 transfer learning, image preprocessing, data augmentation, and model evaluation.
- Exposed inference through a Flask API, integrated it with a React frontend, and deployed the application using Vercel and Hugging Face Spaces.

[Digital Marketplace for Clothing Resale](#) | *React, Node.js, Express, MySQL*

Nov 2024 – Dec 2024

- Built a prototype full-stack P2P clothing resale marketplace with a middleman service to support safer transactions.
- Designed and normalized the MySQL database and created ER/EER, HIPO, and DFD documentation to define data and system architecture.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, C++, HTML/CSS

Frameworks/Libraries: React, Node.js, Express, Flask, TensorFlow, Keras, Pandas, Scikit-learn, NumPy

Developer Tools: MySQL, MySQL Workbench, Git, GitHub, VS Code, Jupyter, Tableau, Excel

CERTIFICATIONS & ACHIEVEMENTS

[Anthropic - Building with the Claude API](#)

Jun 2026

Dean's List | University of Calgary

2025 – 2026
